

Duraflex™ Comfort Keyboard

The New Duraflex Comfort keyboard is an advanced flexible keyboard designed for the most demanding applications.

Duraflex Comfort shares all the features from the popular Duraflex keyboard range, with the added benefit of a super-slim design and carbon pills technology for an uncompromised typing experience.

Simple to keep clean from dust and dirt, Duraflex Comfort keyboard is suitable for any professional environment such as hospitals and laboratories, but is also ideal for manufacturing and food industry use.

Duraflex Comfort is manufactured in durable silicone and can easily be rolled up and stored away. Combined with an external mouse and laptop stand, Duraflex Comfort will create an excellent ergonomic workstation for laptop users.

The low-rise ergonomic design minimise wrist flexing and Duraflex Comfort's extra soft and comfortable keys respond exceptionally fast and precise to key strokes.
